Remote Work Revolution Tsdal Neeley 2021-03-30 LONGLISTED FOR THE FINANCIAL TIMES & MCKINSEY BUSINESS BOOK OF THE YEAR “I often talk about the importance of trust when it comes to work: the trust of your employees and building trust with your customers. This book provides a fresh look at how to build and maintain that trust and connection in a digital environment.” – Eric S. Yuan, founder and CEO of Zoom A Harvard Business School professor and leading expert in virtual and global work provides remote workers and leaders with the best practices necessary to perform at the highest levels in their organizations. The rapid and unprecedented changes brought on by Covid-19 have accelerated the transition to remote working, requiring the wholesale migration of nearly all companies to virtual work in just weeks, leaving managers and employees scrambling to adjust. This massive transition has forced companies to rapidly advance their digital footprint, using cloud, storage, cybersecurity, and device tools to accommodate their new remote workforce. Experiencing the benefits of remote working—including non-existent commute times, lower operational costs, and a larger pool of global job applicants—many companies, including Twitter and Google, plan to permanently incorporate remote days or give employees the option to work from home full-time. But virtual work has its challenges. Employees feel lost, isolated, out of sync, and out of sight. They want to know how to build trust, maintain connections without in-person interactions, and a proper work/life balance. Managers want to know how to lead virtually, how to keep their teams motivated, what digital tools they’ll need, and how to keep employees productive. Providing compelling, evidence-based answers to these and other pressing issues, Remote Work Revolution is essential for navigating the enduring challenges teams and managers face. Filled with specific actionable steps and interactive tools, this timely book will help team members deliver results previously out of reach. Following Neeley’s advice, employees will be able to break through routine norms to successfully use remote work to benefit themselves, their groups, and ultimately their organizations.

Wide-ranging in nature, it explores a variety of topics ranging from stakeholder communication and brand narratives to managing conflict and self-branding. Each chapter contains ample opportunity for readers to put new skills into practice, while case studies act as springboards for further discussion. **English in Business and Commerce** Tamah Sherman 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language, as opposed to analyzing business genres or taking a linguodidactic approach. It expands the regional coverage of English in Europe, with several studies based in Central Europe, and also considers contexts which interact with Europe even though they are physically outside of it (Asia, Africa). It addresses English as just one of several languages at play in the ecology of the countries. It focuses not only on the position of languages as declared in documents of various organizations, that is, language policy, but also everyday linguistic practices as observed in business contexts, that is, interactions. **The Language of Business Studies Lectures** Belinda Crawford Camicciottoli 2007-05-15 New opportunities in the global workplace have heightened interest in business studies. In response to this trend, this book presents an in-depth analysis of a corpus of authentic business studies lectures, focusing on spoken, academic, disciplinary and professional features (e.g., speech rate, interactive devices, specialized lexis) that are crucial to comprehension, but often problematic for non-native speakers. The investigation adopts an original multi-pronged approach including quantitative, qualitative and comparative analyses. It utilizes techniques drawn mainly from corpus linguistics and discourse analysis, but also integrates observational and ethnographic methods to provide unique extra-linguistic insights. The study is thus a full-circle interpretive account of this dynamic spoken genre where academia and profession converge. The book shows how business studies lectures are characterised by a synergy of discourses and communicative channels that reflect the community of practice, highlighting the need to help international business students develop multiple literacies to overcome present and future challenges.
